## **RESUME:**

I'm Graduated in Analysis and Systems Development and Especialist in Computer Forensics and Digital Expertise. I am a leading agile software developer who loves to code and solve problems in a simple and creative way. First I understood and applied the basics of HTML, CSS and JavaScript, but gained experience with usability, user experience, and web positioning practices. I learned to follow best practices in developing front-end and back-end architectures based on the use of pattern design.

I have been in the Information Technology market for more than 8 years with experience in Web Site Development(HTML, CSS, PHP, JavaScript, jQuery, WordPress, Joomla), Web Design(Photoshop, Sketch, CorelDraw, InVision) and Database Modeling(SQL, MySql, Oracle). In addition I have experience with Scrum, DevOps, ERP and CRM.

I love technology and programming because the technology allows us is always in touch with new things and programming works with our mind showing our more creative side.

I am looking for new opportunities that allow me to show my skills, acquire more knowledge and experiences.
